

LON YAR HAO

Full-Stack Software Engineer

haoneo.lyh.011@gmail.com | +84 364 614 373 | Ho Chi Minh City, Vietnam | lonyarahao.github.io/portfolio | github.com/LonYarHao | linkedin.com/in/lon-yar-hao-862549349

PROFESSIONAL SUMMARY

Full-Stack Software Engineer specializing in Laravel, PHP, Vue.js, and React with a track record of shipping production-grade systems — including multi-role LMS platforms, POS systems, and decoupled media APIs. Proficient across the full JavaScript ecosystem (ES6+, TypeScript, Node.js) with active expansion into MERN stack architecture. Maintains a 3.92/4.00 GPA in Computer Science (University of the People) while independently delivering client-facing web applications. Seeking a high-velocity engineering environment through SFP 2026 to apply full-stack systems thinking to real product challenges at scale.

TECHNICAL SKILLS

Languages: Python · Java · C++ · C# · PHP · JavaScript (ES6+) · TypeScript

Backend: Laravel · Node.js · Express.js · RESTful APIs · Eloquent ORM · Blade · MySQL · MongoDB

Frontend: Vue.js · React · Next.js · HTML5 · CSS3 · Bootstrap · Tailwind CSS · Responsive Design

Currently Learning: MERN Stack (MongoDB, Express.js, React, Node.js) — active coursework at Code Lab

Tools: Git · GitHub · VS Code · Chrome DevTools · NPM · Composer · CLI · Web Security

PROJECTS

Online Learning Platform (LMS) github.com/LonYarHao/Online-Learning-platform

[Laravel](#) · [MySQL](#) · [Blade](#) · [Bootstrap](#)

- Engineered a production-grade LMS supporting 3 distinct user roles (Admin, Teacher, Student), reducing manual course administration overhead by an estimated 60% through automated assignment workflows, payment processing, and real-time progress tracking.
- Architected role-based access control system with granular permission tiers, enabling secure multi-tenant course management across unlimited concurrent users.
- Spearheaded a real-time notification engine and progress tracking module, increasing user re-engagement and providing measurable learning milestone visibility for instructors.

Point of Sale (POS) System github.com/LonYarHao/laravel-pos-system

[Laravel](#) · [MySQL](#) · [Bootstrap](#)

- Architected a full-cycle POS platform with role-based access control and real-time inventory tracking, enabling end-to-end sales transaction processing and cutting estimated end-of-day reconciliation time by 50% vs. manual workflows.
- Delivered a comprehensive analytics dashboard with multi-format data export functionality, giving stakeholders immediate access to inventory and revenue insights without technical intervention.
- Implemented secure user authentication and session management, hardening application access against unauthorized use across all user tiers.

Media Platform [Admin Repo](#) · [Client Repo](#)

[Laravel](#) · [Vue.js](#) · [REST API](#) · [MySQL](#)

- Designed and shipped a fully decoupled media platform with a Laravel REST API backend and Vue.js SPA frontend, achieving clean separation of concerns and enabling independent scaling of each layer.
- Engineered RESTful API endpoints for media upload, retrieval, and lifecycle management, supporting structured data flow between backend and client with consistent JSON response contracts.
- Constructed reusable Vue.js components with full API integration, delivering a responsive, seamless user experience across device breakpoints.

CRO Header Optimization github.com/LonYarHao

[Next.js](#) · [TypeScript](#) · [Tailwind CSS](#)

- Delivered a conversion-optimized website header for Talent.os, implementing scroll-triggered animations and custom button variants in Next.js + TypeScript, improving component reusability by 3x and achieving a 95+ Lighthouse performance score.
- Optimized component architecture for improved modularity and code maintainability, reducing duplication across UI elements and streamlining future iteration cycles.

EDUCATION

Bachelor of Science in Computer Science 11/2025 – Present

University of the People

GPA: 3.92 / 4.00

- Completed: Programming Fundamentals (Python) — A+; Introduction to Computer Science (Java) — A; English Composition; Online Education Strategies.

Full-Stack Developer Course 2025

Code Lab

- Completed comprehensive full-stack training covering frontend (HTML, CSS, JavaScript, Bootstrap, Vue.js) and backend (PHP, MySQL, Laravel) disciplines.
- Currently completing MERN stack module (MongoDB, Express.js, React, Node.js) for full-stack JavaScript architecture.

Computer Science (Paused) 2017 – 2020

University of Computer Studies, Yangon | Yangon, Myanmar

- Completed foundational coursework in programming (C++, C#, Java, J2EE), algorithms, data structures, and computer systems.

PROFESSIONAL EXPERIENCE

Translator & Script Writer 09/2022 – 06/2024

YoYoJoy YouTube Channel | Remote

- Translated English-language content into Burmese and authored scripts for movie and series recap videos, consistently meeting weekly publication deadlines in a remote-first workflow.
- Synthesized complex multi-episode storylines into concise, audience-optimized narratives, growing channel content throughput while maintaining quality standards.
- Managed a concurrent pipeline of multiple projects, demonstrating strong self-direction, time management, and cross-lingual written communication skills.

CERTIFICATIONS & LANGUAGES

Full-Stack Developer Certificate — Code Lab, 2025

Responsive Web Design Certificate — Code Lab

EF SET English Certificate — B2 Upper Intermediate (58/100); C2 Proficient Speaking (81/100)

Languages: English (Professional — B2 / C2 Speaking) · Burmese (Native)
